INT. LANDSCAPE NOON

The story starts where a robot is send to the earth, we can see how the spaceship land, the robot leaves the ship and we can see how it shows a message that says look for life.

The robot starts to walk and sees a lot of vegetation, such as trees, grass and flowers.

INT. FOREST NOON

The robot moves along a path in this there is a bird and she is very curious with the robot, then they see each other and the robot wants to catch her, but the bird starts to fly and goes to her nest, the robot follows her to her nest and see that she has eggs.

INT. TREE FOREST, NEST, BIT DARKER

The bird have eggs and she shows him, but the robot have no feelings, so he starts to see all what the bird do like feed itself, take care of the eggs, drink water, improve the nest, etc. The robot starts to learn all of this and develops feelings.

When the bird brings a twig to the nest, the robot tries to help him but he carries a large branch so the bird shakes his head to say no, then the robot takes it and throws it, takes out his weapon and shoots him, in this way small pieces fall and now the bird does accept them.

INT. SKY NOON, SOME CLOUDS

The bird and the robot begin to have a relationship and become good friends, one day when everything seems to be quiet they stay in the nest but suddenly an eagle steals one of its eggs then the bird tries to go through it but the eagle the attacks and the bird falls, the robot gets angry and tries to use its weapon against the eagle but the robot cannot destroy any kind of intelligent life, then decides to fly towards it, so reaches it and attacks it, the eagle drops the egg.

The robot flies quickly to the egg and just when it is about to touch the ground the robot takes it by hand, but does not give it time to protect itself, so it is a bit damaged.

INT. GRASS FOREST, BIT DARKER

Then the bird goes to them and the robot head is pecked by the bird to see how it is and try to wake it up, it just gives the egg and takes it to its nest.

The robot is sore and goes into recovery mode becoming a kind of egg then the bird changes its nest near the robot and takes care of both. It also creates a nest around the robot to take care of it and when it finishes it, it poses on its

head to warm it.

A few days go by and the robot finishes recovering then it turns to its normal form. It sees the nest change and stares at the bird and it is very happy, then suddenly it is heard that the eggs open and sees its baby birds

The robot develops more intelligence and enough feelings to decide that he wants to stay with them and protect them
